Abstract: The FY 2009-2013 Regional Transportation Improvement Program (RTIP) for the Reno/Sparks region is a five-year program of freeway, arterial, transit, bikeway and pedestrian projects. The projects are recommended for various stages of development during the program period of October 2008 through September 2013. The project listing includes the location and description of proposed work, the project cost, anticipated funding sources and the scheduled year of the work.

Local Use Guidelines: State and federal regulations mandate the development of the RTIP. Local agencies and transportation operators must have their major projects approved in the RTIP to qualify for most categories of state and federal transportation funding.
