

# REGIONAL TRANSPORTATION COMMISSION

## TRAFFIC CONTROL REPORT

**May 18, 2012**  
**10:00 AM PDT**

### BRIDGE ST:

Between Front and 3<sup>rd</sup>  
(0.06 mile)

Construction start date is to be determined  
- Reconstruction of the existing roadway.

### CAUGHLIN PKWY:

Between Longknife and McCarran  
(0.80 mile)

Construction start date is to be determined  
- Reconstruction of the existing roadway.

### CRUMMER LN:

Between S Virginia and cul-de-sac  
(0.20 mile)

Construction start date is to be determined  
- Reconstruction of the existing roadway.

### GENTRY WY:

Between Terminal and Chris  
(0.30 mile)

Construction is planned for late summer 2012 or early 2013  
- Reconstruction/rehabilitation of the existing roadway.

### GREEN ACRES DR:

Between S Virginia and cul-de-sac  
(0.07 mile)

Construction start date is to be determined  
- Reconstruction of the existing roadway.

### GREENBRAE DR:

Between El Rancho and Rock  
(0.74 mile)

Construction start date is to be determined  
- Reconstruction of the existing roadway.

### HUFFAKER PL:

Between S Virginia and cul-de-sac  
(0.07mile)

Construction start date is July 30, 2012.  
- Reconstruction of the existing roadway

#### I-580/MEADOWOOD INTERCHANGE:

Between Neil and S Virginia - Construction is in progress

- The northbound on-ramp at Neil Road is scheduled to be closed beginning Monday, May 21, 2012.
- Lanes have been shifted on the freeway mainline and lane widths are reduced. The speed limit has been reduced to 55 mph on the freeway mainline through the construction zone. Additional night time ramp and lane closures may be encountered.
- Isolated lane reductions and full closures with detours may also be encountered on Kietzke, S Virginia, and S McCarran, depending on the work location. McCarran (eastbound and westbound) from Kietzke to S Virginia will be closed between the hours of 9:00 pm and 5:00 am beginning Sunday, May 20, 2012, until Thursday, May 24, 2012.

#### MAYBERRY DR:

Between Truckee River and Canyon Dr  
(1.02 miles)

Construction will begin sometime in June of 2012

- Reconstruction of existing roadway.

#### MERCHANT ST:

Between Sullivan and 450 ft east of Sullivan  
(0.09 mile)

Construction start date is to be determined

- Reconstruction of the existing roadway.

#### MOANA LN:

Between Baker Ln and I-580  
(0.7 mile)

Building demolition work is complete, utility relocation work is ongoing

- NV Energy's contractor Arizona Pipeline will be continuing underground electric utility installation work on Kietzke Ln both north and south of Moana Ln. Later in the week work will begin on the north side of Moana east of Kietzke Lane on the Pioneer Plaza property where Taco Bell is located. Work that will impact traffic on Kietzke Ln will occur at night. Traffic controls and lane closures during construction are anticipated. Moana Ln, Virginia St and Kietzke Ln will remain open to traffic during the day.

#### NEIL RD:

Between Moana/Airway and Gentry Way  
(0.11 mile)

Construction is planned for late summer 2012 or early 2013

- Reconstruction/rehabilitation of the existing roadway.

#### NICHOLS BLVD:

Between E Victorian and Howard  
(1.0 mile)

Construction is planned for May 2012, contract is out for bid.

- New bicycle/pedestrian improvements along corridor; new transit improvements.

#### NORTH VIRGINIA ST:

Between 4th and 6th Streets intersections, inclusive.  
(0.23 mile)

Roadway and sidewalk reconstruction is in progress with pedestrian detours. Traffic controls:

- **Virginia St is currently closed to through traffic and cross traffic at the intersection of 4th St.**
- Southbound traffic will be detoured at 7th St to Sierra St.
- Northbound traffic will be detoured at Commercial Row to Center St.

- The intersection of 6th St and Virginia St will be fully open during this time for the easterly, westerly and southbound traffic. The 5th St intersection is currently open.
- **Please watch out for pedestrian detours and choose alternate routes if possible.**

**PLUMB LANE / TERMINAL WY ITS:**

Construction summer 2012

Install conduit for fiber optic communication lines, replace video detection with loops and Pan/Tilt/Zoom cameras to monitor traffic flow.

**WEST PRATER WAY, PHASE 3:**

Between View and 22nd

(0.2 mile)

Construction start date: June 2012

- Street enhancement along the north side of Prater Way to include sidewalk improvements, street lighting, retaining wall reconstruction, and tree planting.

**RAPID STATIONS:**

The project is substantially complete, and the RAPID buses are running on Center Street. Most of the traffic control is no longer up on the roadway. Some minor traffic control may be active for short term at the RAPID stations to finish some punch list items.

**SIERRA/N VIRGINIA ST:**

Between 9th and N McCarran

Sierra St (approx 1.0 mile); Virginia St (approx 1.0 mile)

Construction to begin approximately August 2012

- Bicycle and pedestrian improvements along S Virginia and Sierra St.

**SOUTH McCARRAN BLVD PH 1:**

Between Virginia and Mira Loma

(2.7 miles)

The area between Virginia and Longley was completed last year. This year, the segment between Longley and Mira Loma will be repaired and widened from 4 lanes to 6 lanes.

- The current work zone is at the north half of McCarran at Longley. McCarran is open with one lane in each direction, with right-turn allowed to south Longley only. Traffic from Longley south of McCarran can turn right or left at McCarran. All other traffic movements are detoured to Airway Dr and Peckham Ln. This configuration is anticipated through mid-June. Motorists are encouraged to continue to patronize the local businesses during construction.
- In addition to the work at the Longley intersection, the contractor will install storm drain pipes at localized areas between Longley and Mira Loma. The work requires closure of one lane; the location of the closure will move along with the location of work.

**SNIDER WY:**

Between Stanford and Steneri

(0.1 mile)

Construction is scheduled for August 2012

- Reconstruction/rehabilitation of existing roadway.

**SOUTH STANFORD WY:**

Between Greg and McCarran

(0.2 mile)

Construction is scheduled for August 2012

- Reconstruction/rehabilitation of the existing roadway; addition of curb and gutter on the south side.

#### SUTRO ST:

Between 4th and N McCarran

Construction start expected April 2013.

#### TE SPOT 2 INTERSECTION PROJECT:

Lane closures at the following intersections:

- Sparks Blvd at Shadow Ln; Disc Dr; Prater Wy
- McCarran at 4th St
- Peckham at Neil
- Mt. Rose Hwy at Thomas Creek
- Plumb at Lakeside
- Sun Valley at 7th

#### TERMINAL WY:

Between Gentry and Plumb

(0.85 mile)

Construction is planned for late summer 2012 or early 2013

- Reconstruction/rehabilitation of the existing roadway.

#### VIRGINIA/SIERRA:

Virginia Street between 9th and Sierra, and Sierra Street between 9th and Virginia

Construction is planned for late summer 2012

- Bicycle and pedestrian improvements consisting of new stutter flashers, concrete work, slurry sealing on Sierra St and new signal at Virginia St and College Dr.

#### VISTA BLVD SOUNDWALLS:

Between N Los Altos Pkwy and Wingfield Hills Pkwy

Construction of Phase II has started.

- All walls have been placed and staining is complete. Landscape planting will begin with possible single lane closure on northbound Wingfield Hills Drive.

#### WEST HUFFAKER LN:

Between Del Monte Ln and Virginia St

(1.1 miles)

Construction start date is set for the end of July

- Pavement reconstruction on the west end of the project from Spring Leaf to Del Monte with some pavement widening, surface treatment from Spring Leaf to Virginia St, and striping changes to accommodate bike lanes.
