**AGENDA ITEM 5**

**TO:** Citizens Multimodal Advisory Committee

**FROM:** Daniel Doenges, PTP, RSP  
Planning Manager

**SUBJECT: 2050 Regional Transportation Plan Call for Projects**

**RECOMMENDATION**

Receive direction on the 2050 Regional Transportation Plan (RTP) call for projects.

**SUMMARY**

The RTC is underway on the development of the 2050 Regional Transportation Plan. The purpose of the plan is to identify the long-term guiding principles and goals for the regional transportation system and to identify the projects, programs, and services that will be implemented through 2050. This plan will be based on a robust community engagement process and conducted in collaboration with partner agencies. The plan will address the safety, mobility, connectivity, and traffic operations issues that are resulting from strong population and employment growth in the region. Federal regulations require that the long range planning document be updated every four years. The current RTP approval extends through May 2021.

The RTC is currently seeking input on transportation improvement projects, programs, and services that should be considered for inclusion in the 2050 RTP. Projects in the current (2040) RTP which have not been completed or initiated will be evaluated to determine if they still appropriately meet regional transportation needs. In addition, there are some new project recommendations from recently completed planning studies such as the South Meadows Area Multimodal Transportation Study and the University Area Multimodal Transportation Study. Similarly, there are several improvement projects that have been suggested by agency representatives and members of the public in response to development and growth in population and employment throughout the region. The RTC has also launched an online survey to solicit ideas from the public on other potential projects.
